 Our plans for Network Drawing

# Network drawing

- Looks like this
- May be printed
- May be zoomed...

#### Network drawing

- Looks like this
- May be printed
- May be zoomed
  - To read details
    - Like critical path

 That has been it for over 20 years

#### We are now working on improvements

- Colors on text, lines, boxes
- More fonts
- Improved box design (today we have 3 designs)
- Section on code fields (also called swimlanes)
- Collapse / expand sections
- Some interactivity.

02.10.2012 02.10.2012

#### Interactivity

Primarily for navigation

Group Cost Elements, program

Cost Activities and act.elements, do not update SAP

Cost Activities and act.elements, calculate progress specification

Make the GUI of the Integrator incl messages multi-language Cost Activities and act elements, calculate progress to Safran

Make a master data sync of Cost Elements
Set up the configurations and test

To work similar as today's Logic Navigator

186       01860       Train users as required         187       01870       Implement in live project         304       03040       Project complete         <	Leveled —— Timenow (21.Jan.2019)	12.Mar.2019 > > Row 48 to 57 of 57

## Interactivity

- Primarily for navigation
- To work similar as today's Logic Navigator
- Option to keep the current activity in the window center
- May be opened in multiple windows
  - As the other windows opened from the menu to the right.

## We are now working on improvements

- Colors on text, lines, boxes
- More fonts
- Improved box design (today we have 3 designs)
- Section on code fields (also called swimlanes)
- Collapse / expand sections
- Some interactivity.

# Network diagram summary

- More colors
- More fonts
- More layouts
- Sectioning
- Interactivity.

## And one more thing...

• With about 3500 activities

• Current version: 3 minutes

• New version: 2 seconds

• > 80 x

More speed!
